Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

A collapsible ballot box (See e.g., GB 20338875, Fig. 1-5; US 2001/0050306, Fig. 1-5) is known in the prior art. However, the additional features of an elongated front and rear support assembly pivotally attached to a base assembly in a horizontal voting position, wherein the rear support assembly forms a compartment for receiving marked ballots received through the slot of the base assembly render the invention novel and non-obvious over the prior art. Further, although a collapsible box with pivotally attached supports is known (See e.g., Oestreich, Jr., US '709, Fig. 1 or Way, US '328, Fig. 1,2), it would not be obvious to one with ordinary skill in the art to modify the prior art folding ballot boxes as claimed. For example, GB '875, the closest prior art, teaches a rear support assembly that also serves as a compartment. However, the addition of a front support assembly that is pivotally attached would require a fundamental re-working of GB '875, and of the other prior art ballot boxes, that is regarded as a non-obvious modification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
